EXPERIENCE

Compunetix (Full-time)

Monroeville, PA

Java Software Developer – Federal Systems Division (FSD) Jul 2023 - Present

- Member of the Platform Manager (PM) team with a focus on development of the Maintenance Client (MC), a mission and conference configuration application for the Mission Voice Platform (MVP)
- Independently created and currently maintain the Record & Playback Service (RPS) Interface, a timestamp-based multi-channel audio player and configuration tool for recorded conference audio
- Conduct ongoing development and extensive research for the second major iteration of the Mission Voice Platform (MVP) that is currently underway

Aramark (Senior Project)

Philadelphia, PA

Backend/Database Developer

Sep 2019 - Jun 2020

- Created a proof-of-concept in a team of 6 for a university meal plan food ordering and delivery iOS app
 - Aggregated and stored menu data using the Marko API and SQL to be displayed within our app
 - Developed a mock ordering and delivery system using Swift, PHP, and SQL
 - Followed an agile development plan with 4-week sprints alongside a team lead at Aramark

Comcast (Co-op)

Philadelphia, PA

Digital Assistant App Developer

Sep 2018 - Mar 2019

- Worked on a team of 5 using AWS Lambda and Go to incorporate the VoiceEdge conference system into the Comcast Business Alexa skill to enhance the user experience
- Independently integrated the Comcast Business Favorites system into the Alexa skill using JavaScript
- Created a frontend in HTML/CSS, JavaScript, and PHP to allow users to directly access and modify their Favorites

OSIsoft, LLC. (Co-op)

Philadelphia, PA

Software Developer

Sep 2017 - Mar 2018

- Converted the proprietary OSIsoft visualization tool to a web-client version within a team of 4
- Designed and developed telemetry code in C# to track the conversion progress of the visualization tool
- Upgraded the UI of the OSIsoft data array display application to a modern version using WPF/C#
